

## Venice Water Booster Pump Station

Construction Update January 2025

### Work scheduled for January 2025:

#### Onsite:

- Install handholes, duct banks, and pipe supports
- Begin exterior framing for stucco system
- Installation of plumbing, electrical, and HVAC systems
- Pressure test entire BPS piping system
- Begin priming and coating interior walls
- Final grade of road base
- Complete solar field installation
- Ground Storage Tank Coatings
- Complete roofing fascia and pump room roofing
- Install roll up overhead door

#### Offsite installations:

- Pull cable from Booster Pump Station to Laurel Road
- Complete installation of air relief valve boxes on Gene Green and Perimeter Roads

Large equipment and machinery will be within the road right-of-way. Please drive slowly, use caution and watch out for pedestrians and workers. Motorists are to follow posted traffic control signs. This schedule may be subject to change.

The City of Venice currently owns and operates one Reverse Osmosis Water Treatment Plant, which serves approximately 26,000 residents from its location near the Intracoastal Waterway. The City is making improvements to the potable water system by constructing a new Water Booster Pump Station (BPS). The BPS will be located on the northern portion of an approximately 40-acre City-owned parcel at the eastern end of Gene Green Road adjacent to Sarasota County's Dona Bay Surface Water Storage Facility.
